

Serving
an industry
that knows
what good
service
means.

Hood Depot™ offers a complete line of ventilation systems covering every conceivable cooking application --and then some. Graziano's Parrilla Argentina, a superb steakhouse, cooks with an *asador*, a huge, low-to-the-ground, wood-burning grill that burns the hard wood of the South American quebracho tree, whose smoke has a distinctive fragrance--part of the trendy restaurant's unique appeal. Hood Depot™ custom designed the asado's circular hood --and the efficient ventilation engineering to assure both code compliance and many years of *La camira de sud*.

Setting a world-wide standard for quality and cutting edge ventilation technology

Cutting edge technology, old world craftsmanship

Hood Depot's manufacturing capability is second to none. Using quality equipment such as our Multi-Cam plasma cutter (above) that cuts stainless steel parts like butter to precise engineering specs. Our metal punch machine (right)

is a Boschert 1250, used to make an array of duplicate parts to exact tolerances of our CNC KAD software, interfaced with our engineering department software, which draws from our Reddit 3D modeling program.

With our commitment to green energy savings, Hood Depot™ offers the Demand control panel, a hood controller with logic circuit that adjusts fan speeds according to peak and slow cooking times to save energy --and money.

Hood Depot™ ships to every location in the world, with established customers in over 22 countries including the Afghan war zone. From a single part to huge multi-hood systems, we do what it takes to bring quality ventilation to others.

Hood Depot™ products:

- Complete Kitchen Ventilation Systems
- Utility Distribution Systems (UDS)
- Kitchen Cool Air Handler
- Demand Ventilation Logic Control Panel
- Air Purification Units
- LED Hood Lights
- Low CFM Energy Saving Filters
- Integrated Fire Suppression Systems
- Full Line of Accessories

Hood Depot™ services:

- Full Factory Service & Installation Support
- Custom Engineering tailored to your needs
- Laboratory tested effective for smoke and grease vapors
- Energy saving, green project specialists
- World-wide shipping and service assistance

Large project or small, we guarantee timely turn-around and delivery to anywhere in the world!
